Empowering Knowledge

- Along with the Academic requirements, ClinicalKey Flex also plays an important role in the Research Requirements of an Institution as it provides Full Text Articles backdated from 2007 (if available) along with Articles in Press for all its 750+ Journals as well as Clinical Trials
- ClinicalKey Flex is also a useful platform for the Clinicians wherein it offers the most updated treat options & procedures (under Clinical Overviews) and can aid the Doctors & Faculties in their quality research and answer their clinical problems as well
- ClinicalKey Flex comprises of Ready to Use Patient Education Handouts which can be customized with Care Provider Contact information, and tailored for each patient with special instructions. The Handouts must also be available in other Languages (Foreign and Regional) to support International Patients as a part of the Medical Tourism Initiative
- An In built Power Point Presentation Maker on ClinicalKey can assist the Faculties (in creating teaching modules) as well as Students (in making presentations, thesis etc..). High Quality Copyright Images can be exported from ClinicalKey onto the Presentation and Hyperlinks of Videos can also be incorporated
- The recently launched Clinical Calculator feature can swiftly provide details about patient (like the Body Mass Index, Renal Failure Index etc..) to the Clinician as soon they enter the Patient Data
- ClinicalKey Flex's comprehensive reference materials eases access to clinical knowledge across specialties which consequently help the physicians/faculties to do more innovative research and help the community. More innovative research will invite more research investors which will improve their perception in employers, research investors, peer groups including academicians and the public, in addition to better competitiveness.
- ClinicalKey Flex can be accessed by multiple users at any given point of time, from the Institution Network, outside the network as well as from the Mobile phone through the APP. User Names & Passwords can be created by way of Remote Access so that they can access ClinicalKey Flex
