Proprietary Article Certificate

To Whom It May Concern

This is to certify that we, Turnitin, LLC, are the sole manufacturer of iThenticate (“Product”) and hold patents related thereto.

The Product is being produced on the basis of our proprietary technology and we would like to declare that, to the best of our knowledge, no other manufacturer is supplying the Product or a product with the same features and technology.

Thanking you,

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'gor'.

Angela Rhee for Chris Caren, CEO
Turnitin, LLC

31st January, 2023

iThenticate®, including its associated components, is a single source product developed and sold by Turnitin, LLC, Oakland, CA. Our product is a unique service that is not offered by any other vendor or reseller in a similar format. The product may be procured only from Turnitin, LLC, at the address listed below. iThenticate is an item for which competition is precluded due to patent (SYSTEMS AND METHODS FOR FACILITATING ORIGINALITY ANALYSIS - USPTO 8,296,661 and ITHENTICATE SERVICE MARK - USPTO 3,018,444).

The iThenticate service provides plagiarism prevention and “prior art” research data. Utilizing our unique technology, iThenticate searches the Internet, as well as our database of periodicals, journals, newspapers, encyclopedias, and electronic books for sources of potential plagiarism and/or duplication. The service then generates a custom Similarity Report that highlights and provides links to any textual matches found on the Internet and/or in the proprietary databases that we now search.

To find potential plagiarism, Turnitin has developed its own search technology (in use for over 15 years). Turnitin's proprietary crawler is different than many other solutions that rely on search engines such as Yahoo or Bing's Search API but cannot scale because of cost or request limitations. Our crawler has been built from the start to be horizontally scalable, smart about recrawling, lean on storage, and flexible about what can be done with data. Some of the key features you can expect from our crawler:

- Broad, scalable, focused crawl of the web.
- Prioritized (re)crawl, and how often.
- Persistent, query-friendly store of the crawl frontier allowing for useful, rapid reporting.
- Smart crawling that will avoid junk (ex. crawler traps).
- Crawling non-HTML file types.
- Support for selectively crawling JavaScript-based sites.

Turnitin's patented and proprietary technology compares submitted papers to a database of subscription-based electronically published content that covers mainstream to specialized sources on virtually every popular, business and professional topics, including:

- CrossRef, which includes more than 47,000 journals and over 74 million articles and documents from publishers including: Wiley-Blackwell, Elsevier, American Institute of Physics, IEEE, Cambridge University Press, Taylor and Francis, Springer Nature, Emerald, British Medical Journal and the New England Journal of Medicine.
- 200,000 law reviews from U.S. law schools
- 10,000 cited journals in the world (according to SCOPUS data)

- Partnership with CORE, the world's largest aggregator of open access papers, giving us access to 135 million records from 9,777 repositories worldwide which, where accessible, are added to our internet database
- Over 85 million links from more than 4,500 open access repositories
- More than 41 million Wikipedia articles provided through directly ingesting content

Submitted documents generate a Similarity Report that includes multiple views and features:

- Reports available within minutes of submission
- Direct source comparisons of matched words to matched documents (highlighted with or without color coding) numbered and aligned side-by-side
- Pattern recognition matching of both word for word and paraphrased materials
- Ability to exclude matching material within quotes, within the Bibliography, or any individual match
- Ability to view all underlying matched words that have been obscured by overlapping matches
- Accepted submission formats including: Word®, Word® XML, WordPerfect®, Rich Text Format, HTML, Text, PostScript, PDF
- Option to resubmit the Similarity Report to include all current data in the database
- Option to create an organization specific database of documents for internal database Similarity Reports
- Redundant backup of all data in case of catastrophe, loss of power or connection to the internet
- GDPR and SOC 2 Compliance
- Live Help Desk support
- Electronic Training Materials

If you need additional information about our services, please contact me at 510-764-7600, or visit our website www.ithenticate.com. Thank you for your interest in iThenticate.

Sincerely,
